

HU-CHAIN

Human energy as the foundation of a new economy

Human energy → Structure → Value

Human Energy Evaluation (HUNIT)

HU-Engine captures a person's contribution across four energy axes.

Each action is converted into a measurable HUNIT — the foundation of every future block.

What HU-Engine does:

- **analyzes the action and its context**
- **calculates HUNIT across 4 energy axes**
- **prepares data for glyph generation**
- **protects the system from simulations and false inputs**

HU-Engine is the foundation of accuracy within HUMAS System.

Every Glyph Becomes a Recorded Block

HU-Chain transforms a glyph into an energy block and builds a sequence of verified contributions.

The chain grows from real human actions.

What HU-Chain does:

- **receives the glyph-code**
- **creates the block (hash, HUNIT, Q, timestamp)**
- **links blocks into an autonomous chain**
- **forms the full energy history of the system**

HU-Chain is the structure of trust and the semantic backbone of the new economy.

Issuing Value from Human Energy

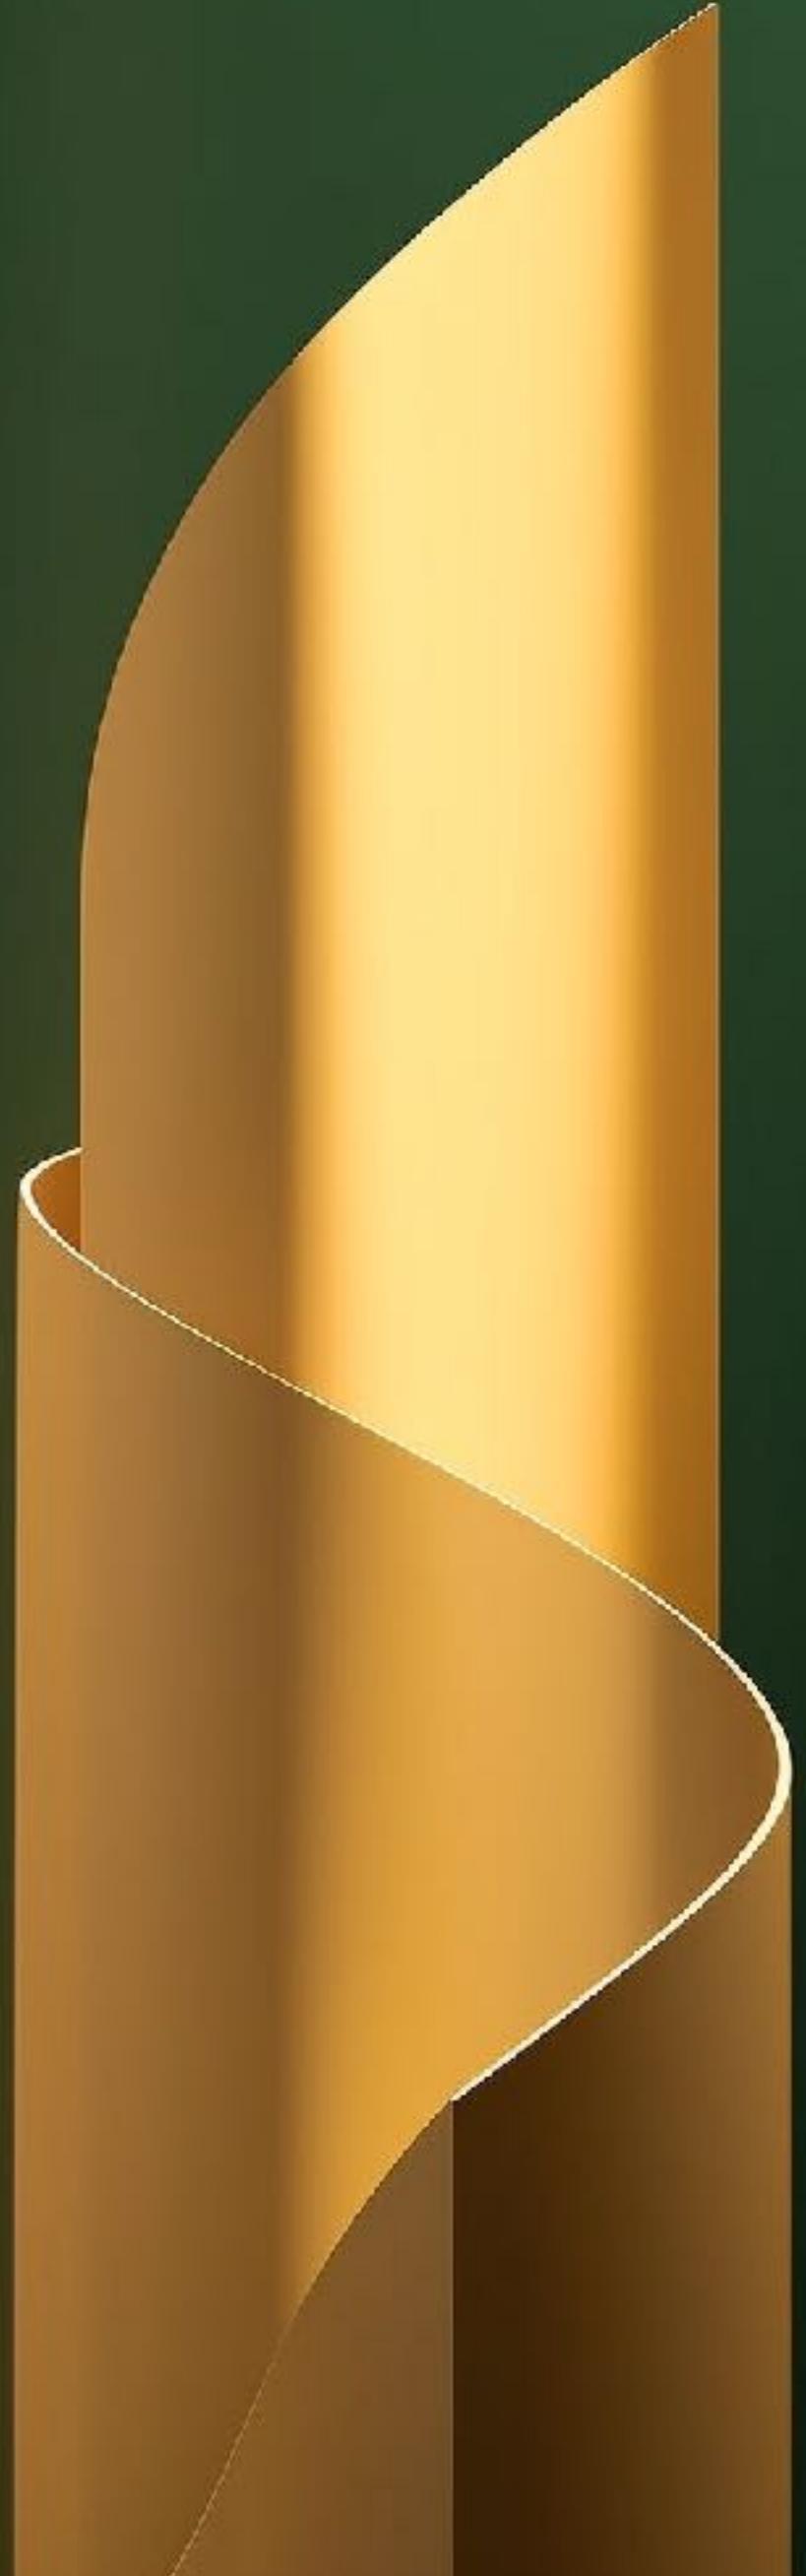

HUMAScoin arises solely from verified human energy.

It is a currency created by contribution — not speculation.

Emission process:

- **aggregating energy within HU-Chain**
- **converting hu → HUMAScoin**
- **issuing HUMSX on Solana**
- **distributing value among participants and system funds**

HUMAScoin is a currency of meaning, rooted in real human action.

Investment & Use of Funds

Round: €2.8–3.2M for 24 months

Purpose of the round — launch an autonomous economy built on human energy:

HU-Engine → HU-Chain → HUMAScoin

Outcome of the round

An autonomous system where human contribution becomes value, and HUMAScoin becomes its expression.
