

## HUMAS System Memorandum

HUMAS System is an ecosystem built on human energy. Each participant creates value through contribution, attention, movement, and interaction.

We affirm this memorandum as the foundation of the system.

It is open to all who respect human energy and choose to act consciously, honestly, and creatively.

### Core Principles:

1. **The Human is the Core.**

Every part of the system is built around the individual and their energy.

2. **Energy is Measurable.**

HUNIT is the unit that records contribution — physical, intellectual, emotional, and cognitive.

3. **Contribution Converts.**

Human energy transforms into HUMAScoin — a digital value rooted in effort and participation.

4. **The Glyph is a Signature.**

Each participant receives a unique glyph that reflects their energy. It becomes an identifier, a symbol, and a language.

5. **Value Remains.**

Every contribution is preserved, recognized, and can be passed on. Energy doesn't vanish — it transforms.

6. **The System Evolves.**

The HUMAS System architecture grows with those who join it. Principles remain — the form evolves.

This memorandum is a living document.

It may expand, but its essence stays unchanged: respect for the human, transparency of processes, and focus on energy.
