

HUMAS System — Roadmap (2025–2027)

2025 — Foundation & First Layer

- Launch of personal user cabinet (web + mobile)
- Release of HU-Translator (glyph-based ID + energy analysis)
- Production and distribution of NFC wristbands and smart cards
- Start of pre-sale and onboarding of first 1,000 participants
- Listing of HUMAScoin on exchange and start of internal circulation
- Activation of community validation and glyph-based signatures
- First use-cases in defense, education, and decentralized networks

2026 — Infrastructure & Autonomy

- Development and launch of HU-Chain (two-layer blockchain)
- Integration of AI Core for energy traceability and glyph logic
- Release of Energy ID — inheritable, self-sovereign identity
- API for partners and business modules (EdTech, CivicTech, HR)
- Expansion of NFT-glyph architecture with smart contract logic
- DAO architecture planning, legal framing for international use

2027 — Scaling & Global Application

- Creation of a global network with anchor hubs across major macro-regions
- Cross-sector adoption (gov, corporate, public)
- Integration of HUMAS System into national-level infrastructure
- Launch of glyph-based democratic mechanisms (voting, decision-making)
- Monetization through data API, licensing, and verified participation
- Stable user base of 1 million+ and projected valuation of €100–250M
